Address: District 8, HCM City   Hometown: Dong Ha, Quang Tri

PERSONAL SUMMARY

I have knowledge and understanding of algorithms, always practice to develop programming thinking. I have a habit of always trying to update new technologies, learn more frameworks and how to apply them to my personal projects. At the same time, never forget to improve your soft skills and English, both in normal daily communication and in-depth work.

PERSONAL PROJECT

Airline reservation management website   **Nov 2023 - Dec 2023**

Link Demo: **airline-reservation-dbserver.database.windows.net**
Github: https://github.com/LinhDancute/Airline-Reservation-MVC-Aspnet/tree/B7

- Introduction: Website that allows users to sign up/sign in, find out flight information, accompanying services and buy tickets. Administrators can CRUD and manage flight route information, users (adding roles, assigning permissions, setting passwords,.. .), account information (2-factor authentication, adding external links, arising code to authenticate the application, resetting passwords,...), invoices, statistics,...
- Technologies: .Net Framework7 MVC, Linq, Entity Framework6, SQL Server, Identity Server7, Azure Data Studio, Docker
- Beside: Design system operating procedures through ERD, Sequence diagram, Activity diagram, Use case, DFD, BFD, Testcase. Use git to manage and keep track of my code

Online Shoes Shopping System   **Feb 2023 - Jun 2023**

Link Demo:
Github: https://github.com/LinhDancute/Online-Shoes-Shopping-System_PHP/tree/main/Web2

- Introduction: This online shopping system has three modules namely Admin, Employee and Client. Admin can CRUD products, add new employees, grant permissions for Employees to view/edit/create. Users are allowed to sign up/sign in (by external provider: google or regular login by authenticating account via gmail), shop, store products in the shopping cart even if the website is turned off and view purchase history
- Technologies: PHP, Javascript, SQL, MySQL Workbench, Ajax, JQuery, Bootstrap
- Services: Twilio SMS (Authentication), PHPMailer (Authentication), OAuth 2.0 to Access Google APIs (Authorization)

Web API Ecommerce   **Oct 2023 - Nov 2023**

Link Demo:
Github: https://github.com/LinhDancute/Ecommerce-AspNet-EBAPI/tree/main/API_ASP.NET/Ecomm/Ecomm

- Introduction: Allows access, user authentication, use of services and features without needing to access website's interface
- Technologies: ASP.NET Core MVC 6, WebAPI, Fluent API, Entity Framework, SQL Server, Postman

AREAS OF EXPERTISE

- ASP.NET MVC 6/7, Web API, ASP.NET CORE
- SQL Server, MySQL Workbench, Azure Data Studio
- Docker, Postman, Xampp, Git
- Angular 12, Django, JavaScript, SQL, Ajax, JQuery, Bootstrap
- VMware, Ubuntu, CentOs
- PHP, Java, Python, C++, Sql, Linq
- Winform, JavaSwing

EDUCATION & CERTIFICATIONS

Junior student of Information Technology
Major in Software Engineer

Saigon University 2021 - Present
