Software Engineer with nearly **2 years** in **insurance**, building distributed **.NET** systems using **DDD**, **CQRS**, **Event Sourcing**, and **event-driven microservices**, with additional **Angular** and **PHP/Laravel** experience.

WORK EXPERIENCE

Junior Software Engineer Contemi Insurance Domain – Full-stack Engineer Tech stack: .NET 8/9, Angular 19, Angular Formly, EventFlow, JsonApiDotNetCore, PostgreSQL, Docker - Engineered DDD aggregates with CQRS and Event Sourcing using EventFlow, eliminating recurring business rule defects. - Architected event-driven microservices and integration events to enable scalable cross-service communication. - Delivered 10+ large-scale features supporting UAT completion and multiple production go-live releases. - Built JSON:API REST APIs and optimized PostgreSQL indexing and query plans to improve production read performance. - Developed reactive Angular applications with Formly, RxJS, and standalone components for complex insurance workflows. - Increased release stability by implementing BDD (Gherkin) scenarios during Scrum/Agile sprints PHP / Laravel Project (2 Months) - Implemented revenue-generating Change Requests in production, contributing directly to additional client billing cycles. - Operated Dockerized services via CLI and integrated Elasticsearch, offloading heavy queries and improving search responsiveness in live environment. AI & Engineering Productivity - Accelerated delivery and test scaffolding using GitHub Copilot. - Designed structured solution plans and custom AI agents with Spec Kit / OpenSpec. - Integrated Rovo with Jira and explored MCP-based AI workflows.	Dec 2024 - Present VietNam
Intern Software Engineer Contemi Insurance Domain – Software Engineer Intern - Contributed to .NET backend and Angular frontend development, resolved API and UI defects before release cycles. - Applied Clean Code principles and supported feature implementation in Reinsurance project.	Sep 2024 - Dec 2024 VietNam

CERTIFICATIONS

Microsoft Applied Skills: Accelerate AI-assisted development by using GitHub Copilot (Credential ID: E6822D20DEE3A8C) [🔗](#) **Jul 2025**
by Microsoft

LANGUAGES

Englist (Full professional proficiency)

EDUCATION

Software Engineering in Information Technology Saigon University Elected Class Representative: Recommended by my advisor, a Ph.D. associate professor	Jan 2021 - Present
--	---------------------------

PROJECTS

Airline reservation management website 🔗 Back-end: Built microservices using .NET 7/8, implemented service communication via HttpClientFactory, secured authentication with Duende IdentityServer6 and JWT, and data access with EF Core (Fluent API), LINQ, SQL Server. Front-end: Developed Angular SPA and Blazor Web interfaces integrated with backend services. Testing & Documentation: Tests with xUnit, Karma, Jasmine and produced ERD, sequence diagrams, and use case.	May 2024 - Jul 2024
---	----------------------------

SKILLS

Backend & Architecture: .NET 8/9, ASP.NET Core, DDD, CQRS, Event Sourcing, Event-Driven Microservices, EventFlow, Clean Architecture, JsonApiDotNetCore
Frontend: Angular 19, Angular Formly, RxJS, Standalone Components, TypeScript
AI & Productivity: GitHub Copilot, Spec Kit / OpenSpec (custom agents), Rovo, MCP concepts, Antigravity
Testing & API Tools: BDD (Gherkin), Unit & Integration Testing, Postman
DevOps & Infrastructure: Docker, Kubernetes, Linux, WSL, Rancher Desktop, .NET Aspire, Git
Database & Search: PostgreSQL, Elasticsearch, Query Optimization
Additional: PHP/Laravel, Kafka, RabbitMQ (academic projects)
